

Keep Your Family Safe and Connected with Fortress Power

- **Latest Technology** - We use the safest, environmentally friendly Lithium Iron Phosphate technology
- **All-in-one Solution** - Smart energy management system supports multiple applications
- **Lowest Cost Per Cycle** - Competitively priced and easy to install with high round-trip efficiency
- **Long Lasting** - 10-year warranty; up to 6,000 cycles

SECURE YOUR ENERGY

Did you know that your solar system **STOPS WORKING** when the grid goes down?

Adding Fortress Power Energy Storage to your solar PV system enables you to maximize the use of your clean solar energy by storing excess solar for use at night.

- Provide power during grid outages
- Lower your electrical bill by avoiding having to buy electricity at peak times
- Enjoy a 30% investment tax credit when incorporating with solar
- Increase your independence from the utility grid

With Fortress Power, you can use your solar power all day and night – even during grid outages!

Our mission is to provide compact, user-friendly and affordable lithium energy storage solutions using the latest technology for all homes and businesses. Fortress Power's smart and innovative energy storage units can be easily integrated with new and existing PV systems. They work by storing clean energy for when you need it most – it's that simple.

"Fortress Energy Storage keeps my family safe & provides us with reliable outage protection!"

Fortress eVault 18.5 Lithium Battery

Fortress Power’s engineers are on a mission to provide you with the most advanced Lithium Iron Phosphate Battery available! Not only is the new Fortress eVault 18.5 kWh battery safe, long-lasting and affordable, but is also equipped with a brand new LCD screen that displays voltage, current, state of charge, and power output.

The built-in Battery Management System integrates multilevel safety concepts for excellent performance:

- Overcharge and Deep Discharge Protection
- Over Current Protection
- Voltage and Temperature Monitoring
- Over-heat protection
- Cell Monitoring and Balancing

Those safety features are demonstrated on the LCD display. Plus, our technology is capable of connecting 12 units in parallel to achieve 222kWh! These batteries connected in parallel can communicate with each other for voltage monitoring and balancing.
