BURNDY® WASHERS

INSTALLATION INSTRUCTIONS

For Pole Mounts

Please read carefully before installing.

Burndy LLC recommends that the sufficient details of the installation be submitted to the AHJ for approval before any work is started.

WEEB-9.5

WEEB-9.5NL

WEEB-LUG-6.7 assembly

Products are tested to UL 467, CAN/CSA-C22.2 No. 41
US / Canadian standards for safety grounding and bonding equipment.
WEEB COMPATIBILITY

The WEEB family of products can be used to bond anodized aluminum, galvanized steel, steel and other electrically conductive metal structures. All installations shall be in accordance with NEC requirements in the USA and with CSA C22.1 in Canada. The WEEBs are for use with modules that have a maximum series fuse rating of less than 25A.

Bottom Mounting Modules

The WEEBs used for bonding the PV modules to the mounting rails are compatible with various cross-sections of module frames. The following is an example of a module frame that is compatible. Notice that the WEEB teeth are positioned completely under the edge of the module frame.

Important Note:

Inspect each module frame used with a WEEB to ensure that the bottom mounting face of the frame is flat, and that there are no hinderances to embedding WEEB teeth. Do not use a module with a frame that prevents the WEEB teeth from embedding fully.
Components of the mounting structure are electrically bonded using the WEEB-9.5NL.

Entire mounting structure is grounded using the WEEB-LUG-6.7 assembly.

Solar modules are electrically bonded to the frame of the mounting system using the WEEB-9.5.

Important notes

1. Use general purpose anti-seize compound on fastener threads when installing WEEBs.
2. The NEC section 690.43 states, "Exposed non-current carrying metal parts of module frames, equipment, and conductor enclosures shall be grounded in accordance with 250.134 or 250.136(A) regardless of voltage."
WEEBLug INSTALLATION

1. WEEB teeth towards rail

Drill 1/4 inch clearance holes at lug mounting locations.

Assemble WEEB-LUG-6.7 assembly and torque fasteners to 10 ft-lb / 13.5 N-m using general purpose anti-seize compound on threads.

Tighten to 7 ft-lbs / 10 N-m.

Install one lug on the strong back and one lug on the pole.

Important note:

The WEEB-LUG-6.7 may be used with a maximum equipment ground wire of 6 AWG.
Lay in equipment ground conductor and torque bolt to 7 ft-lb / 10 N-m.

Equipment Ground Conductor
Install WEEB-9.5NL at every angle bracket to bond strong back and module mounting frame.
3

Tighten fasteners to 15 ft-lbs / 20.3 N-m after aligning all rack members. Use general purpose anti-seize on threads.

Install two WEEB-9.5 per module, one on each rail.

Push WEEB-9.5 into 5/16 inch clearance hole.
Tighten fasteners to 15 ft-lbs / 20.3 N-m using general purpose anti-seize on threads.
