

WARRANTY

Item	Warranty
Auto Accessories	90 days from date of purchase
Adventure Power Products – Power Sport Batteries	1 year from date of purchase
Alkaline Batteries	Warranted against manufacturer defects
Battery Packs	Rechargeable - 1 year from date of purchase Non-rechargeable – warranted against manufacturer's defects
Carbon Zinc Batteries	Warranted against manufacturer defects
Chargers	1 year from date of purchase
Door Lock Packs	Warranted against manufacturer's defects
Energizer® Automotive Power Accessories	6 months from date of purchase
Hearing Aid Batteries	Warranted against manufacturer defects
Jump Starters	90 days from date of purchase
Lithium Coin and Cylindrical Batteries (non-rechargeable)	Warranted against manufacturer defects
Lithium – rechargeable	1 year from date of purchase
Magnetic Locks	1 year from date of purchase
Power Supplies	1 year from date of purchase
Rechargeable Batteries – Nicad, NiMH	1 year from date of purchase
Sealed Lead Acid Batteries – AGM and Gel	1 year from date of purchase
Sirens & Horns	1 year from date of purchase
Smoke Detectors	90 days from date of purchase
Solar Chargers	1 year from date of purchase
Transformers	90 Days from date of purchase
Watch/Calculator	Warranted against manufacturer defects

General Information

Product information, depiction and/or details may vary and change from time to time. Customer is solely responsible for reliance on or use of any information, and for use or application on any product. Please contact us for any questions related to our products or services.

Terms & Conditions

For our Credit Application and Terms & Conditions, please contact a UPG Sales Professional at 469.892.1122.

Limited Liability

UPG shall not be liable for consequential, incidental, special, exemplary, or punitive damages. UPG's liability in all circumstances shall not exceed the purchase price paid for the product that gives rise to the liability.

UNIVERSAL™ Sealed Lead-Acid Batteries High DC Voltage Disclaimer

Due to the absolute electrical isolation that must be established and maintained to assure the safety of high voltage DC applications, UPG recommends that not more than eight Universal™ 12V sealed lead-acid ("SLA") batteries or 100 VDC be connected in one circuit. Before and after installation, always exercise extreme care to identify any possible breach in the case of any SLA battery connected in series. It is the responsibility of each user to determine that their application is adequately designed with safety features to be compatible with any and all conditions that may arise during the use of their application, and in conformance with all existing electrical code standards and requirements. Under no circumstances will UPG be liable for consequential or incidental damages arising from the use of Universal™ SLA batteries.
