Portable Solar Generator

This unique and powerful mobile solar generator creates up to 1.5 kW hours of daily off-grid electricity that will run lights, water pumps, computers communication equipment and power tools.

Simple to use, just position the trailer, tilt and plug in your equipment. Finally, a clean energy portable solar generator that is incredibly robust, able to operate continuously in harsh environments such as strong winds, rain, snow and heat. The solar panel will continue to collect and produce energy even in periods of modest light due to overcast skies.

Built in the USA, this mobile unit comes packaged on a pallet for shipping anywhere in the world.

Blue Pacific Solar® is a specialized solar equipment dealer; affordable grid-tied kits, off-grid DIY packages & portable solar products.
